Danielle Peloquin received her B.A in English and History at Hartwick College in Oneonta, NY; where she was awarded the John Christopher Hartwick Scholarship for excellence in her fields. In 2011, she was granted her M.S in Library and Information Science from Simmons College in Boston, MA. Danielle is a member of the History Honor Society (Phi Alpha Theta), English Honor Society (Sigma Tau Delta), and the Library Science Honor Society (Beta Phi Mu). Additionally, she was inducted into Who's Who in American Colleges and Universities in 2007. After spending five years working in museums and archives, she decided to return to academia as a professor at Coleman University.

A self proclaimed book-nerd, Danielle owns more books than all of her other possessions combined. In her free time, she can be found wandering the exhibits at the Museum of Man, scrutinizing the galleries in the Museum of Photographic Arts, or gazing upon the fossils at the Natural History Museum. Her obsessions include the macabre, B-rated armageddon movies, and waiting for thunderstorms. As Senior Instructor of CASE, she is eager to bring her diverse interests and background to the department and its instructors.

BIOGRAPHY

Janice Webb

A native of San Diego County, Janice has deep roots here at Coleman: both her father and brother-in-law are Coleman graduates.

Never one to stop and ask for directions, Janice somehow found herself in Boise, Idaho in 1994. While there, she decided to get educated in the ways of Computer Information Systems, obtaining a Bachelor's of Business Administration in that field in 1997. In June, a newly-graduated Janice wandered even further east to obtain her Master's Degree in Library Science from the University of North Carolina at Chapel Hill. If asked about this move, she would say "I just wanted to go to one of the best library schools in the nation."

Janice is a great believer in lifelong learning, and she believes that all students can learn how to learn if given the proper tools. She not only owns this belief, she is also a client. Janice continued her formal training by receiving her Master's degree in Education in 2008. She has also achieved certifications in Sharepoint and Microsoft Word and continues to seek new knowledge every day.

Janice has actively served Coleman University as a member of several committees including the Spark of Ingenuity, Student Affairs Review Board, Diversity Committee, and Employee Practices and Standards Committee. As an adjunct faculty member of the College of Advanced Studies in Education (CASE), Janice acts in the interest of faculty on these committees as well as representing the interests of the library. If elected to the Faculty Governance Board, Janice will continue to represent faculty interests in much the same fashion.

I, Mark A. Peterson, started as a student at Coleman College in 1998, and received my certificate in Computer Information Science (CIS) in 1999 and my Bachelors in CIS in 2001.

During the summer I worked for San Diego County Fair as the Student Showcase Web-Site creator. After the Fair, I worked for a medical software company known as Raintree Systems Inc., in which I was a senior support tech for the doctor's interfacing with insurance companies. At Raintree I was a problem solver for many challenging issues, which required programming, networking, security, and communication skills. I became one of the principle support programmers in working with the Health Insurance Portability and Accountability Act (HIPAA) at Raintree System Inc.

I returned to Coleman for my Masters of Science in Information System Management and graduated in May of 2008 with Summa Cum Laude (4.0) and perfect attendance.

Dr. Furr hired me as the first teaching assistant (TA) for the College of Graduate Studies (CGS) for the Decision Support Systems (COM671) in July of 2008. The CGS department has had many other TAs, but I have been the constant TA for all courses. When the MBA program started to grow to the point of needing a TA, I was there. I started to teach CIS courses in San Marcos near the end of 2009, starting with Programming Concepts and Design (COM120). Later I taught C++ (COM275), and Internet Programing III (COM289). The whole time I continued to be the Lead TA for CGS. I became the Instructor for Management of Information Security (COM656) in 2010. In 2011, I taught Database System Management (COM660) and Management of Emerging Technology (COM690). In January 2012, I became full time for CGS as an Instructor, Lead TA, data keeper, curriculum development, and test pool editor.

During my time at Coleman University, I have seen it grow from a college to a university. I would be honored to have an active and contributing role, as the College of Graduate Studies Representative on Faculty Governance Board, in the continuing growth, evolvement, and development of Coleman University's future.

Biography

Dr. Joy Walden is an instructor of business administration and she specializes in strategic management. She received her PhD. in Strategic Management from Alliant International University. With an academic background in strategy and economics, her research interests include strategic and business management, corporate externalities; corporate social responsibilities; offshore outsourcing; resource-based view; environment and natural resources utilization; economics; and education strategy.

Dr.Walden is a full-time faculty member of the College of Graduate Studies at Coleman University in San Diego where she teaches Strategic Planning, Quantitative Management, Financial Management, Marketing and Project Management. In addition, she supervises the MBA thesis program.

Before joining Coleman University, Dr. Walden taught various courses at Alliant International University, Maastricht School of Management in Netherlands, FHR Institute for Management in Suriname, DeVry University, Ashford University, and Palomar College as an adjunct and visiting faculty. She has also served as a dissertation committee member at Alliant International University and University of Malaya.

Prior to joining academia Dr. Walden had extensive experience in both public and private sector organizations as well as consulting experience in both the national and international business arenas. She also has substantial experience in peer reviewing for professional journals in Strategic Management and the Technological Forecasting and Social Change (Elsevier).

Scott Lindeneau has been with Coleman University for the past 20 months. He started working in the GDD program as a full-time instructor teaching one of the Game Development core programming classes. Since then he has become Senior Instructor, developed several courses for GDD, assisted in the ongoing redesign of the CIS curriculum and taught in both the CIS and GDD classrooms. He has served on the Faculty Practices and Standards Board, the Programmatic Review Committee, the Leadership board and the Spark of Ingenuity board. He has researched, written and negotiated policy with both faculty and administration. Scott is prepared to help bring Coleman University forward and is committed to giving faculty a voice in our institution.

Scott Lindeneau graduated from University of California, Berkeley with awards. He has assisted, instructed and developed curriculum for students around the world in several disciplines, many age groups and at various institutional levels. He believes that students come first and that the most powerful tool you can give a student is curiosity. He wants to see Coleman University giving students a strong, rigorous education that prepares them for more than just the workplace.

Charlie Morgan – Biography

I am a 70 year old man, with two children and four grandchildren. I hold two Bachelor degrees. The first was awarded by San Diego State with a major in "Biology and General Science for the Secondary Credential". That degree was awarded in 1965. My second degree is a Bachelor degree in CIS. That degree was awarded in 2010.

My history at Coleman University began with my enrollment in the CIS Core in 1998. In July of that year I had completed the Core Certificate requirement and began work as a TA. In October of that year I began teaching as an adjunct faculty member. In February of 1999 I became a full time instructor and have served in that capacity to the present time.

As a part of the WASC initiative I have served on a committee that has changed names several times. Presently the committee is responsible for both faculty and staff matters. That committee has been responsible for proposals for both the Staff Handbook and the Faculty Handbook as well as the proposal that has led to the election for the initial Faculty Governance Committee.
